

The **European Power Plant Suppliers Association** has the pleasure of inviting you to our **Annual Technology Evening** at the Sofitel Brussels Europe, on 28th January 2009 with the Theme:

“CCS: From Pilot to Demo”

The event will, among others, feature the **results from “Schwarze Pumpe” the world’s first oxyfuel firing Carbon Capture & Storage plant**, operational since September 2008. This is an unmissable opportunity to see the **first, measured results from CCS**, rather than merely projected ones.

In addition, the event will feature new insights into the political future of research, including CCS, in Europe, thanks to presentations by the European Commissioner for Research, **Janez Potočnik**. A representative of the Czech Republic’s Presidency of the European Union will also present the Council’s position.

The evening will also feature a dinner speech on the future of fossil-fuel power generation under the new Obama administration in the United States.

Schedule:

- 15:30 *Coffee & Registration*
- 16:00 *Welcome* – EPPSA President, Andreas Wittke
- 16:05 *Council energy goals* – Representative of the Czech Republic
- 16:20 *Research in Europe* – European Commissioner for Research, Janez Potočnik (confirmed)
- 16:30 *Results from the world’s first oxyfuel-firing Carbon Capture & Storage pilot plant* – Vattenfall Europe’s CEO Tuomo Hatakka (confirmed)
- 16:45 *Q & A* – Open to the floor

- 17:10 *Cocktails & Canapés*
- 18:00 *Walking Dinner & Speech: The American fossil fuel perspective* – Speaker TBC
- 18:30 *Champagne Raffle & Caricaturist*
