

IGCP/SIDA-594 PROJECT,
ASSESSMENT OF IMPACTS
OF MINING AND MINERAL
PROCESSING ON THE
ENVIRONMENT AND HUMAN
HEALTH IN AFRICA

TRAINING COURSE

THE ASSESSMENT OF IMPACTS OF MINING ON THE ENVIRONMENT: THE GEOCHEMIST'S APPROACH

University of the Witwatersrand
Johannesburg, Republic of South Africa
July 13th- 15th, 2013

TRAINING COURSE THEMES

- Principles of environmental geochemistry
- Methods of environmental monitoring
- Mobility and bioaccessibility of metals in soils
- Applications of geochemical modelling
- Assessment of hazardous properties of mining wastes
- Phytoavailability of metals and metalloids
- Lead and copper isotopes in environmental application
- Modelling of resuspension of dust particles in mining districts

CONTACT

For more information, please contact Isabel Weiersbye and Alexandra Wald,
